SKILLS

Skills: Software Development, React.js, Next.js, TypeScript, Tailwind CSS, Node.js, Postgres, REST APIs, Software Testing, Github Actions, Computer Networking, TCP/IP, Troubleshooting, Claude, Codex, Agentic Development

PROFESSIONAL EXPERIENCE

PPLSI **July 2022 - July 2026**
Software Engineer *Phoenix, Arizona, United States*

- Engineered scalable, user-centric frontend applications for a CRM platform using React and TypeScript, delivering seamless performance and an intuitive user experience across diverse platforms.
- Collaborated with product managers and clients to translate requirements into impactful frontend features, contributing to successful project delivery and a high-quality user experience.
- Led frontend modernization initiatives by reducing technical debt, updating dependencies, and implementing error reporting, resulting in significant improvements in application maintainability, performance, and observability.
- Developed RESTful API controllers within a microservices architecture to retrieve, transform, and persist application data, enabling reliable backend workflows and seamless integration across distributed services.
- Diagnosed and resolved real-time production issues swiftly, minimizing user impact and ensuring high reliability of frontend applications in critical environments.
- Leveraged AI-powered development tools to accelerate time-to-market, improve code quality, and streamline development workflows, enhancing team productivity and overall delivery efficiency.

Opendoor **November 2021 - July 2022**
Senior IT Engineer *Phoenix, Arizona, United States*

- Led full-stack development of data-heavy inventory management dashboards utilizing React, TypeScript, and Chart.js.
- Engineered robust backend services with Node.js, Express, and Postgres, ensuring seamless API integration and enhancing data management efficiency for inventory systems.
- Established comprehensive inventory standards and operational processes organization-wide, significantly improving data consistency and reliability in financial reporting.
- Mentored junior technicians in troubleshooting software, hardware, and customer-reported technical issues, while supporting their professional development and improving overall team performance.
- Founded and directed the inventory team, defining roles and optimizing workflows, increasing operational efficiency and improved user feedback scores on service delivery.

Infosys **May 2021 - November 2021**
Software Engineer *Sacramento, California, United States*

- Engineered responsive frontend functionality using React, Sass, and Redux, focusing on performance and maintainable component architecture to elevate user experience.
- Collaborated with cross-functional teams, leveraging strong communication skills to translate requirements into high-quality user interfaces aligned with project standards.
- Implemented and maintained automated UI and unit tests, ensuring reliability and accessibility across multiple releases, raising overall quality standards.
- Optimized CI/CD workflows by developing Jenkins pipelines, enhancing build and deployment reliability.

Apple **May 2019 - May 2021**
Network Engineer *Sacramento, California, United States*

- Executed first-level response to critical data center network alerts, ensuring swift triage and escalation to maintain system reliability.
- Orchestrated hardware replacement and configuration across global data centers, minimizing downtime and enhancing operational efficiency.
- Managed critical data center network alerts, enabling rapid triage and escalation to mitigate potential disruptions.
- Led hardware replacement and configuration efforts across global data centers, achieving minimal downtime and improved system reliability.

- Diagnosed and resolved applications, hosts, and network connectivity issues for customers and internal teams, facilitating prompt solutions.

Apple **May 2018 - May 2019**
IS&T HelpLine Analyst *Mesa, Arizona, United States*
- Delivered multi-channel technical support via phone, chat, and email for retail and corporate applications, ensuring rapid issue resolution.
- Facilitated incident resolution collaboration between support and engineering teams, driving timely outcomes.
- Evaluated incident impact on business operations, managing cases through hierarchical ticketing systems for prioritized escalation.

Apple **August 2017 - May 2018**
Lead *Phoenix, Arizona, United States*
- Cultivated a robust company culture, driving operational excellence through decisive team leadership and strategic initiatives.
- Elevated employee performance and professional growth through targeted coaching, fostering a culture of continuous improvement.
- Facilitated professional development by delivering tailored coaching and actionable feedback, enhancing team capabilities.
- Resolved escalated customer and business issues by implementing effective, timely solutions, ensuring high satisfaction rates.

Apple **September 2015 - August 2017**
ASLP (Apple Store Leadership Program) Associate *Phoenix, Arizona, United States*
- Cultivated a positive store culture by aligning team behaviors with Apple's mission and values, enhancing employee engagement and customer satisfaction.
- Assessed employee performance through targeted feedback and coaching, driving individual development and team effectiveness.
- Streamlined scheduling processes to optimize staffing levels in response to business demands while adhering to payroll budgets.
- Implemented efficient scheduling strategies that aligned workforce availability with business needs, ensuring compliance with payroll constraints.

Arizona Army National Guard **October 2007 - October 2013**
Specialist *Phoenix, Arizona, United States*
- Executed security operations for Arizona Border Patrol, enhancing border safety and operational integrity.
- Led team initiatives to meet project deadlines, ensuring effective operational flow.
- Maintained composure under pressure, consistently achieving mission objectives in high-stress environments.
- Facilitated training sessions to elevate team skills and foster professional development.
- Oversaw soldier accountability and management of sensitive equipment, ensuring operational readiness and compliance.

EDUCATION

Arizona State University **January 2010 - December 2011**
Bachelor's, Kinesiology

Paradise Valley Community College **January 2008 - December 2009**
Associate of Arts (AA), General Studies

CERTIFICATIONS

Cisco - CCNA
Linux Professional Institute - Linux Essentials
The University of Arizona - Full Stack Web Development
